

The Sixth General and Science meeting of Japanese Biological Safety Association

November 24, 2006 (Friday)

Agenda

Opening remark [9:25 ~ 9:30] Chairman of the Meeting H. Watanabe

Session 1 Safety Management [9:30 ~ 11:30] Chair T. Kurata

- |  |   |           |
|--|---|-----------|
| 1) Revision of Infectious Disease Control Law; For use and storage of pathogens                              | Health Service Bureau,<br>Ministry of Health,<br>Labour<br>and Welfare, Japan | A. Miki   |
| 2) What changes by integration to the new Infectious Diseases Control Law of the Tuberculosis Prevention Law | Health and Welfare<br>Department, Yamagata<br>Prefectural Government          | T. Ahiko  |
| 3) Current status of bio-safety at 76 prefectural Institutes of Public Health in Japan                       | Sakai City Institute of<br>Public Health                                      | T. Tanaka |

General meeting [11:30 ~ 12:15]

\*\*\*\*\*

\*\*\*\*\*

Asia-Pacific Symposium for Biosafety

---Biosafety in Asia-Pacific---

[13:30~17:00]

Organized by the National Institute of Infectious Diseases

Co-organized by the Japanese Biological Safety Association, the Japanese Society for Virology, the Japanese Society for Bacteriology, and the Japanese Society for Clinical Microbiology, and the research group for "Biosafety strengthening and establishment of Biosecurity systems regarding to pathogenic microorganisms", Research on Emerging and Re-emerging Infectious Diseases, Ministry of Health, Labour and Welfare, Japan

Supported by the Japanese Association for Infectious Diseases

Admission free and Simultaneous interpretation (English/Japanese) provided

\*\*\*\*\*

\*\*\*\*\*

Welcome Party [ 17 : 45 ~ 19 : 45 ]

November 25, 2006 (Saturday)

Topics [9:15 ~ 10:00]

Chair K. Yamanishi

Highly pathogenic avian influenza

“Preparedness and crisis management of avian influenza and human influenza pandemics ”

Department of Virology III,  
National Institute of Infectious  
Diseases

M. Tashiro

----- Break 10 min -----

Special Session Pathogenic Bacteria from Biosafety point of view [10:10 ~ 12:20]

Chair H. Watanabe

- |                                |   |              |
|--------------------------------|---|--------------|
| 1) Bacillus anthracis          | Obihiro University of Agriculture and Veterinary Medicine                       | S. Makino    |
| 2) Plague                      | Department of Bacteriology I,<br>National Institute of Infectious Diseases      | H. Takahashi |
| 3) Tularemia                   | Department of Veterinary Science,<br>National Institute of Infectious Diseases  | O. Fujita    |
| 4) Clostridium botulinum toxin | Graduate School of Life and Environmental Sciences, Osaka Prefecture University | S. Ozaki     |

----- Lunch [12:20 ~ 13:10] -----

Session 2 Applied subjects [13:10 ~ 14:10]

Chair S. Ando, K. Yoshida, and S. Kogure

- |  |                                     |            |
|--|-------------------------------------|------------|
| 1) Training for biological safety in regional institute of public health                                     | Hokkaido Institute of Public Health | S. Iki     |
| 2) Consideration of reliability on inflow velocity measurement for class II biological safety cabinets (BSC) | Airtech Japan, Ltd.                 | K. Takagi  |
| 3) Protective Performance of Biological Protective Clothing Materials Against Penetration of Synthetic Blood | AZEARTH Corporation                 | S. Kumagai |

### Session 3 Hospital • Health Laboratory Biosafety [14:30 ~ 17:30]

「Countermeasure for improvement of Health Labs」

Chair M. Nagasawa, H. Sagara, and A.

Kitabayashi

- |  |   |                               |
|--|---|-------------------------------|
| 1) Current Action of Japanese Society for Clinical Microbiology and related Academic Societies toward a new government regulation of infectious diseases and pathogens | Graduate School of Medicine,<br>Gifu University                 | T. Ezaki                      |
| 2) TB Infection Control Measures in a Clinical Laboratory  | TB Bacteriology<br>Consultant                                   | C. Abe                        |
| 3) Influence and problems owing to upcoming revision of the Infection Law of Japan   | Dokkyo Medical<br>University<br>Hospital                        | K. Okuzumi                    |
| 4) Medical laboratories-Requirements for safety  | Miroku Medical<br>Laboratory,<br>Inc.                           | E. Yanagisawa                 |
| Additional utterance:<br>Problems of Biosafety in autoanalyzer   | Medical Diagnostic<br>Center of<br>URAWA Medical<br>Association | K. Kamiyama                   |
| 5) Planning of BSL3 clinical laboratory facility   | Hitachi appliances, Inc.<br>Yashima • Eco • System<br>Co.LtD    | T. Okubo<br>A.<br>Kitabayashi |
